Cloquet, Minnesota 55720**

**Finding of No Significant Impact (FONSI)**

**Project:** Magellan Linear Anode Power ROW Project

**Location:** Black Bear Golf Course 1785 Minnesota Highway 210, Carlton, Minnesota 55718, on the Fond du Lac Reservation in Carlton County, Minnesota.

Based upon the attached Environmental Assessment (EA) for the Magellan Linear Anode ROW Project involving the installation of a 240 volt AC underground power line across 355 feet of Tribal Trust Land at a depth of 24 inches to supply power for a linear anode for cathodic protection for Magellan Midstream Partners, L. P. pipeline all on the above described property on the Fond du Lac Reservation, I have determined that by implementation of the Fond du Lac Band of Lake Superior Chippewa proposed action and environmental mitigation measures as specified in the EA, the proposed Magellan Linear Anode ROW Project will have no significant impact on the quality of the human environment. In accordance with Section 705(a) of the Fond du Lac Tribal Environmental Policy Ordinance (TEPO) (Ordinance #05/10, adopted by Resolution #1343/10 of the Fond du Lac Reservation Business Committee on September 21, 2010), an Environmental Impact Statement will not be required for this proposed project.

This determination is supported by the following findings:

1. Agency and FdL staff consultation and coordination was conducted and environmental issues related to development of the Magellan Linear Anode ROW Project were identified. Alternative courses of action and mitigation measures were developed in response to environmental concerns and issues.
2. Section 4 of the Environmental Assessment discloses the environmental consequences of the proposed action and two potentially viable alternatives were considered, including the “no action” alternative.
3. The proposed action is planned to not jeopardize any federally or state listed threatened or endangered species. A Key to the Northern Long-Eared Bat 4(d) Rule for Non-Federal Activities was prepared, which determined an “Incidental Take” finding for the selected alternative. No notification to the U.S. Fish and Wildlife Service is necessary.
4. Section 4 and Appendix describe that there are no adverse effects on cultural properties.
